

THERMAL REMEDIATION CLIENT PREPARATION CHECKLIST

IMPORTANT: This notice must be signed before our thermal remediation team arrives.

Clark Pest Remedy service specialists are trained to treat your bed bug infestations with minimum damage to your home and furnishings. However, we require that the less heat-tolerant items listed below are removed. Place these items in boxes labeled "Do Not Heat" and place the boxes near the front door. Do not remove these items from the building, as they may be infested. Your service specialist will inspect these items for bed bugs and leave for property management to remove from the area. Should these items show signs of infestation; Clark Pest Remedy will provide treatment options available for those items. Once the facility has been cleared of each of the items listed below, initial under "Client."

If you have questions, please talk with your Clark Pest Remedy representative prior to treatment.

Call: 770-957-1915

Email: gclark@clarkpestremedy.com

- Clean up clutter. Empty and remove all garbage from wastebaskets. Please seal up all trash and dispose of. Properly sealing the trash and removing from building without contaminating common areas is extremely important.
- Clear the common areas prior to heat treatment. Make sure you have room for large heaters to be placed in the apartment.
- Use laundry baskets to place clothing, linens and towels in them. Leave nothing packed away. These are areas bed bugs hide in; stacks and piles lead to longer treatment times. Do not pack baskets tightly or over fill them
- Items in your residence will be moved, shifted, opened, and rotated by our team.
- We will have to move piles around and spread them out to thoroughly bring everything up to temperature. Items will not be refolded and things may not be in the same place when you return.
- We must have two feet of clear access to all walls including closets. This is to allow proper heat flow behind furniture which is a common hiding place for Bed Bugs. If you can not move these furniture items please advise your service representative.
- All mattresses and furniture of all types should remain in the residence until treated, these items can hide insects.
- Electronic equipment is typically rated for temperatures of 130 to 150 degrees. Please unplug and power down before the treatment. All electronics need to remain in the residence for treatment; they are highly suspect to infestation.
- Fans are utilized for air circulation during the heat treatment process. Special concern should be given to small pictures, wall items, and paperwork that may be blown off walls, tables, etc. Containers or boxes can be used to loosely stack these items.

- Remove all pressurized cylinders, aerosol cans, soda cans, paints, and flammable chemicals. House plants should be removed. Please inspect these items for bed bug eggs.
- Remove or place all soaps, candles, cosmetics, bottled alcohols, and medications in the refrigerator or bathtub prior to the treatment.
- One of a kind items such as heirlooms and other higher value items which are not replaceable should be removed from the residence. Please inspect these items for bed bugs or bed bug eggs and have our technicians inspect them also.
- You must prepare a set of clothing for the day of treatment. This requires you to have dryer at a higher temperature to heat your clothes. These clothes then need to be sealed in a plastic bag to change into before leaving for the day.

It is common practice for us to Remove the Screening on the bottom of the Box Spring. Box Springs are the number 1 hiding place for Bed Bugs. The screen is generally stapled onto the bottom and Bed Bugs can go in and out easily. By taking the screen off we can inspect and treat the Box Spring so much better than we have found it necessary to remove this. We recommend encasements be installed immediately after treatment and if so this will not be visible. If you DO NOT want your Box Spring Screen removed please share this with your representative and treatment technicians.

On treatment day you must leave behind everything in the apartment to be treated. Please be available to enter the apartment for a 10 minute period during treatment with Any special items you need treated. The technician will advise you on a time to return for the ten minutes and then when the treatment will be finished.

- Check your car and storage locker for any items that you think may need treatment. Items that are removed for that day and are not treated may create infestation.

Treatment times will vary according to design and the amounts of personal content. Please plan on being out of your residence for a minimum of 10 hours. Your cooperation with the checklist above is imperative, appreciated, and will facilitate a successful chemical free treatment.

By signing below I am acknowledging that I have read the above checklist and hold Clark Pest Remedy harmless for items not removed from property or prepared for treatment properly.
